PROFILE

Fullstack software engineer based in Stockholm, Sweden. I specialize in web development with knowledge in all steps from idea creation to publishing.

EMPLOYMENT HISTORY

Backend Developer, Google (Contract)   Stockholm
2025 — Present

- Helping migrate the public Fitbit API.
- Contributing to in-house tools and frameworks to improve overall speed of development as well as reduce development hiccups.
- Writing clean code with tests focusing on 100% code coverage.

DevOps engineer, Scania (Contract)   Södertälje
2024 — 2025

- Created CI/CD pipelines to automate development and deployment processes.
- Built and maintained AWS infrastructure using services like EC2, RDS, and Route 53 to support scalable applications.
- Developed and optimized Docker images for containerized deployments, ensuring consistency across environments.

Lead Software Engineer, Klimra (Contract)   Stockholm
2024 — 2024

- Led the end-to-end development of Klimra's public facing website and initial backend system.
- Built a clean and responsive frontend UI in React based on Figma designs.
- Designed SQL databses and deployed AWS infrastructure.

Software Engineer, Duelbits   Remote
2023 — 2024

- Contributed to the in-house React UI library by creating reusable components and improving existing ones.
- Added new features as well as expanded existing functionalities on the Duelbits platform and admin panel.
- Translated design concepts and database structures into clean code.

Web Developer, CloudBackend   Remote
2022 — 2023

- Created applications for the CloudBackend dashboard using an in-house framework.
- Helped improve said framework by adding new features and fixing bugs.
- Helped develop and maintain APIs.
